Randy Clark, MD Coral Desert Orthopedics 1490 E. Foremaster Dr., Ste. 150 St. George, UT 84790 435-628-9393 phone 435-628-9382 fax

Dr. Randy Clark Shoulder AC joint reconstruction Physical Therapy Protocol

| Sling Immobilizer | Range of Motion | Exercises | Goals |
|--|---|--|--|
| At all times | Elbow and wrist motion only -no shoulder movement | No lifting/pulling/pushing | Decreased pain and swelling |
| *At all times except in PT *Keep elbow supported for 6 weeks to decrease forces at reconstructed AC joint | 1-Pendulums 2- passive ROM only FF to 100, ER to 20 3-No manipulation | 1-Scapular stabilization 2-No resistance training or strengthening 3-no lifting/pushing/pulling 4- no cross body adduction for 6 weeks | 1- passive FF to 100 2- passive ER to 20 3- decreased pain and swelling |
| Remove sling at 8 weeks | 1-advance passive ROM to active assist ROM to full active ROM 2- No manipulation | 1- no lifting/pushing/pulling greater than 3 lbs 2- ok to use arm for eating, grooming | 1- Full ROM with normal scapular-humeral rhythm |
| No sling | Full ROM | Begin RTC band strengthening program no weights no lifting/pushing/pulling greater than 5 lbs | |
| No sling | Full ROM | 1-Advance resistance strengthening 2-Begin Isokinetics 3-Emphasize eccentric strengthening | 1- full strength |
| | At all times *At all times except in PT *Keep elbow supported for 6 weeks to decrease forces at reconstructed ACjoint Remove sling at 8 weeks No sling | At all timesElbow and wrist motion only -no shoulder movement*At all times except in PT1-Pendulums 2- passive ROM only FF to 100, ER to 20 3-No manipulation*Keep elbow supported for 6 weeks to decrease forces at reconstructed ACjoint1-Pendulums 2- passive ROM only FF to 100, ER to 20 3-No manipulationRemove sling at 8 weeks1-advance passive ROM to active assist ROM 2- No manipulationNo slingFull ROM | At all timesElbow and wrist motion only -no shoulder movementNo lifting/pulling/pushing*At all times except in PT *Keep elbow supported for 6 weeks to decrease forces at reconstructed AC joint1-Pendulums 2- passive ROM only FF to 100, ER to 20 3-No manipulation1-Scapular stabilization 2-No resistance training or strengthening 3-no lifting/pushing/pulling 4- no cross body adduction for 6 weeksRemove sling at 8 weeks1-advance passive ROM to full active ROM 2- No manipulation1- no lifting/pushing/pulling greater than 3 lbs 2- ok to use arm for eating, groomingNo slingFull ROM1- Begin RTC band strengthening program 2- no weights 3- no lifting/pushing/pulling greater than 5 lbsNo slingFull ROM1-Advance resistance strengthening 2-Begin Isokinetics 3-Emphasize eccentric |
